

***Introducing the ULTRAMAGIC “ADVENTURE 90” balloon system package.***

The “**ADVENTURE 90**” balloon system package is based on the “MAGIC CLUB” package which has been available from Ultramagic for many years. Ultramagic has now introduced a stock 90 design as is available with the 77 “MAGIC PACK”. At the same time the start up price has been lowered by reducing the amount of equipment in the package. However this is not a cut quality or reduced specification package balloon. Ultramagic have created a distinctive top of the range 90 package at a special price.

It is expected that the Ultramagic **ADVENTURE 90** will be instantly noticeable at balloon events around the world both on the ground and in the air as well. A rich black theme is introduced throughout the balloon.

Black fabric is noticeable throughout the **4 stock 90,000 cu ft envelope designs** as is the black full height nomex throat, scoop and black load tapes. The envelope has the special feature of the parachute and top 5 panels being in Ultralast fabric included in the price.

The full size **1.15m x 1.45m basket is straight top** in design and finished in the highest quality smooth black leather. Black rope handles are used throughout. The basket is straight top for 2 reasons. Firstly this is to make the best use of space in the basket but also it is so designed to allow the taller 40kg gallon to be safely installed as an option. A black basket tidy is fitted inside the basket to accept fire extinguisher etc. A pilot restraint harness (black of course!) is also included in the package.

The standard package includes a **MK 21 single burner**. It is well known that this powerful burner has 2 of everything so it is equipped with all of the system redundancy and back up advantages of a double burner but without the weight or price. However upgrades to a double MK 21 burner will be allowed at a special price.

The standard package includes **two 30kg cylinders** complete with quick shut off valves, black padded jackets and black straps. Extra cylinders are offered at list price with no special pricing. However the two 30kg cylinders can be upgraded to two 40kg cylinders at a special price.

**Instruments are not included in the package price.** It is expected that many pilots buying this package system may already have instruments and as such instruments have been left out of the special package price to keep the entry level price as low as possible. However a special price on instruments will be made when they are ordered with one of these packages.

“**ADVENTURE 90 LITE**” envelopes are available to **special order** at a special upgrade price.

“**ADVENTURE 90**” envelopes can be **purchased separately** subject to availability.
