

SERVICE INSTRUCTION 03/11

Publication Ref. Number: 100

Date: 27/Jul/2011

SUBJECT

Flying wire attachment with Quick Links

CATEGORY

Advisory

APPLICABILITY

All Ultramagic envelopes where Quick Links are used for the attachment of flying wires to the envelope

COMPLIANCE

Achieve at pre-flight inspection

BACKGROUND

It has been found at an annual inspection that a number of Quick Links attaching the flying wires to an envelope had become loose and undone. This service instruction is a reminder to complete the applicable Pre-flight Checklist as required and also to carry out preventative maintenance as specified in section 3.1 of Maintenance Manual Supplement number 3 – The alternative use of quick links for flying wire replacement.

INSTRUCTIONS

This is a reminder that flying wire integrity, security and attachment should always be checked prior to each flight as part of the pre-flight inspection. Where quick links are used to attach flying wires, checks of the security of these connections are part of the pre-flight check. If any quick links are found to be loose then ensure that the screw gate is securely closed. Screwlock Loctite should be used on the thread.

In doubt contact your Ultramagic dealer or the factory.

Josep M Lladó Costa

DOA Head – Aeronautical Engineer
