Tekno 50

The ultimate light weight travel pack balloon system

The super light weight 50,000 ft³ **Tekno 50** envelope weighs less than 50 kg including bag. This 16 gore 8 wire easy to inflate envelope packs down into a bag no larger than that normally used for a 31! Made complete with Ultralite fabric the envelope uses the latest light weight Kevlar load tapes as well as a number of other innovative weight saving materials.

The ultimate light weight travel pack balloon system

ULTRAMAGIC S.A.

The burner which compliments the **Tekno 50** package is the hugely successful and innovative **POWERPLUS** single designed by **Paolo Bonanno** and developed in conjunction with Ultramagic. A superb light weight powerful burner coupled with a light weight basket. The ideal combination for a Tekno travel pack balloon.

The burner is fitted into a small lighter frame and folds flat to fit neatly into an optional padded travel bag. A padded travel bag is also available for the Tekno basket.

The **MK21 single burner** is also approved for use with the Tekno basket

The **Tekno** basket – **POWERLUS** / **MK21** burner combination can also be supplied with a range of light weight envelope types and sizes ranking from 31,000 ft³ to 77,000 ft³.
